| Outside enabled boundaries | 235     | —        | —       |
| Total                      | 235     | —        | —       |

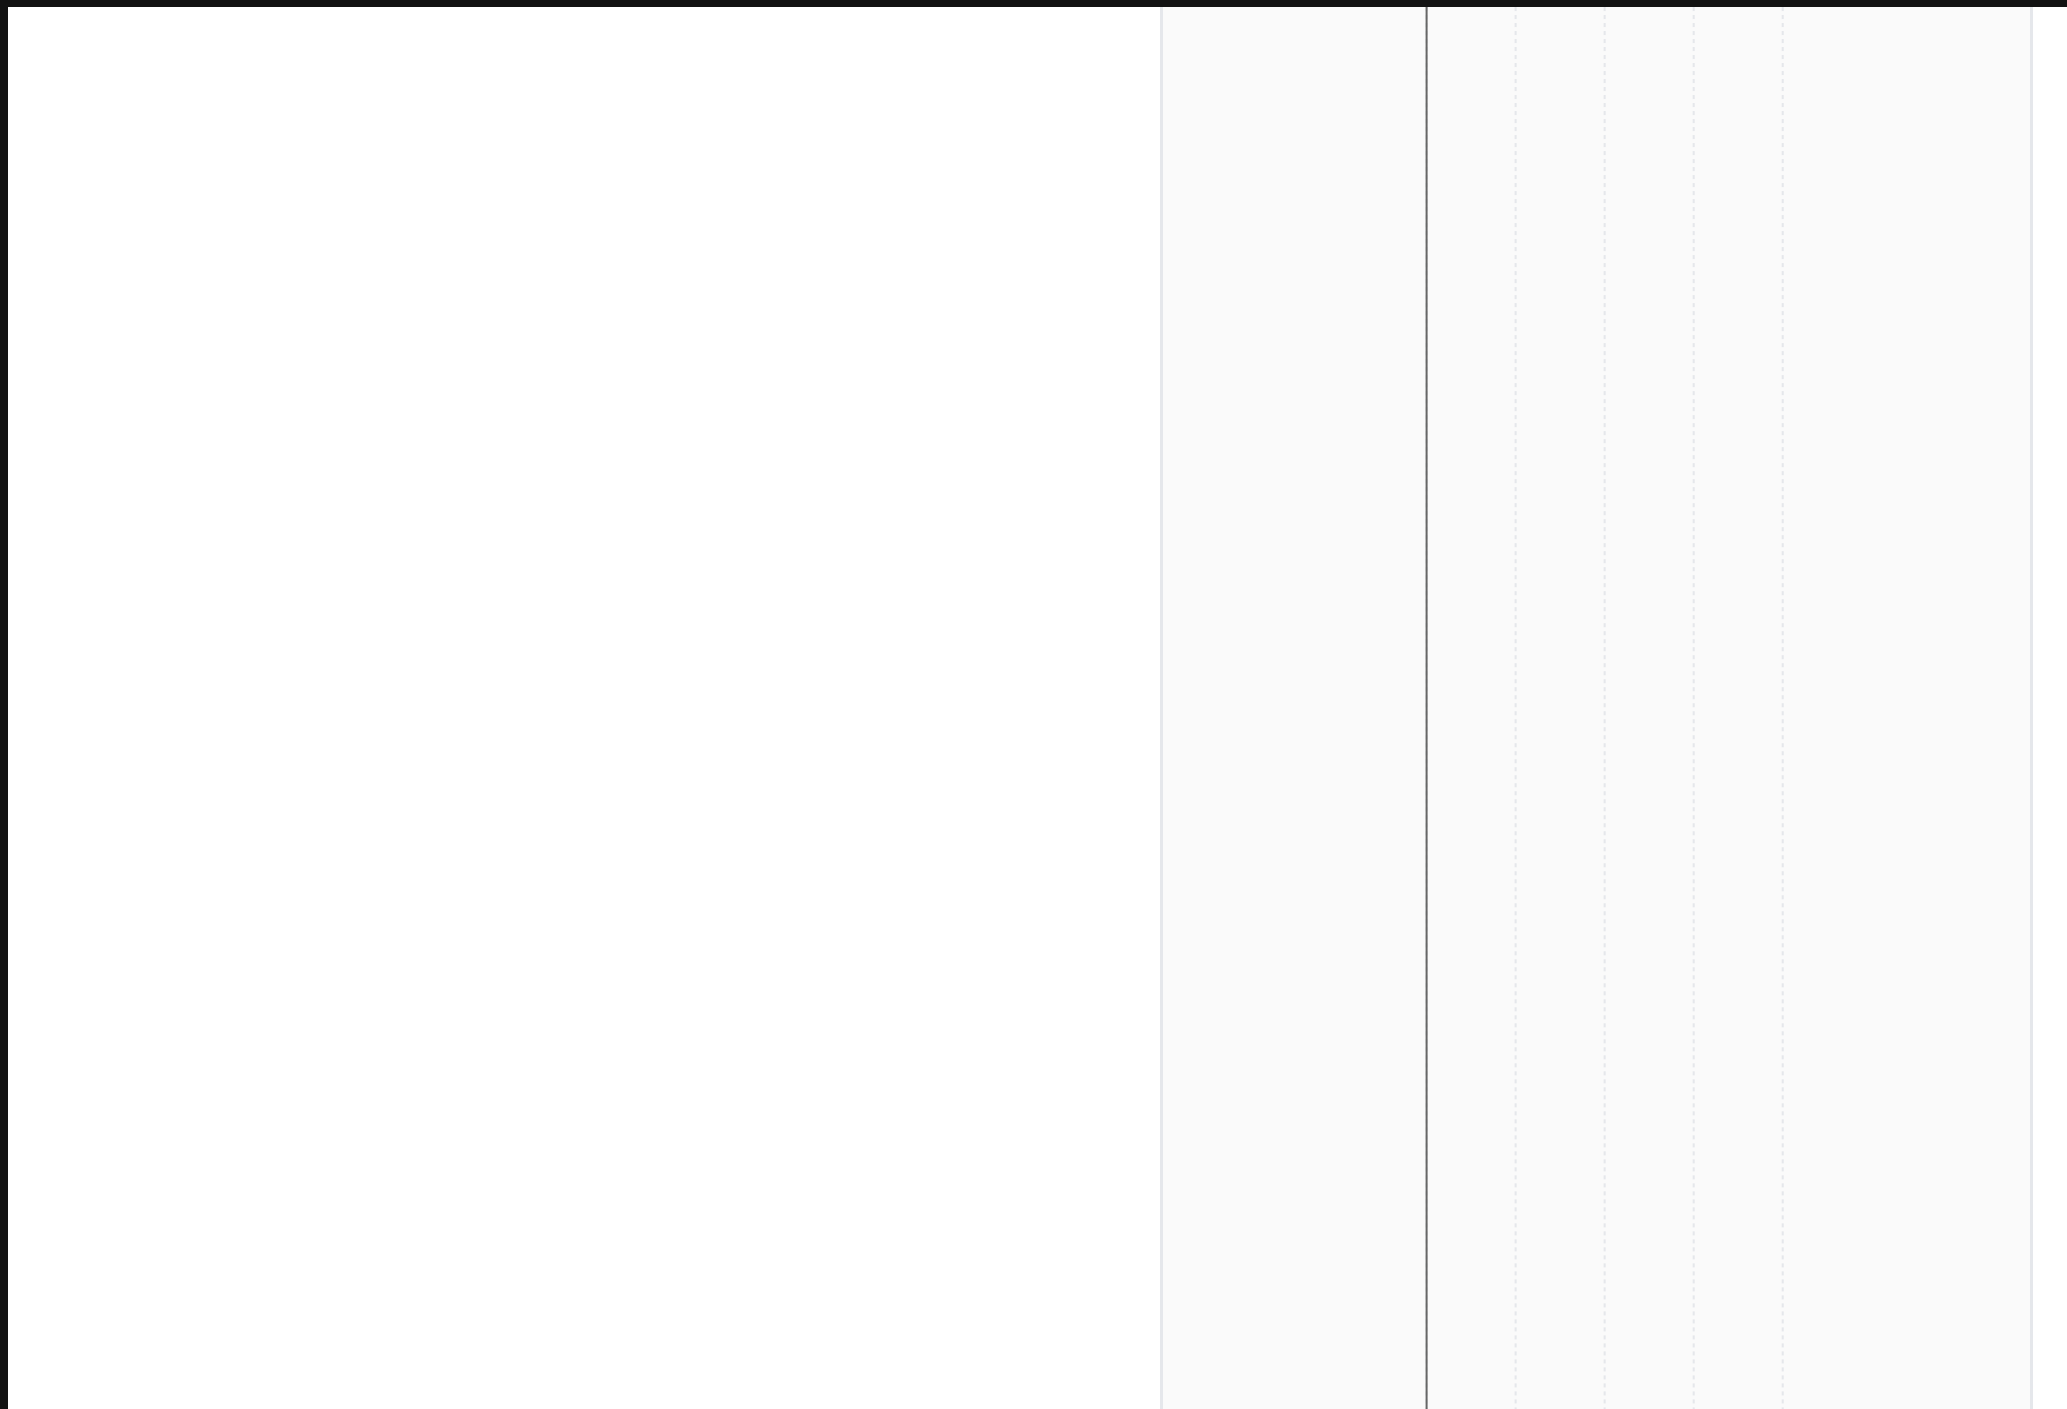

Patrols per Boundary

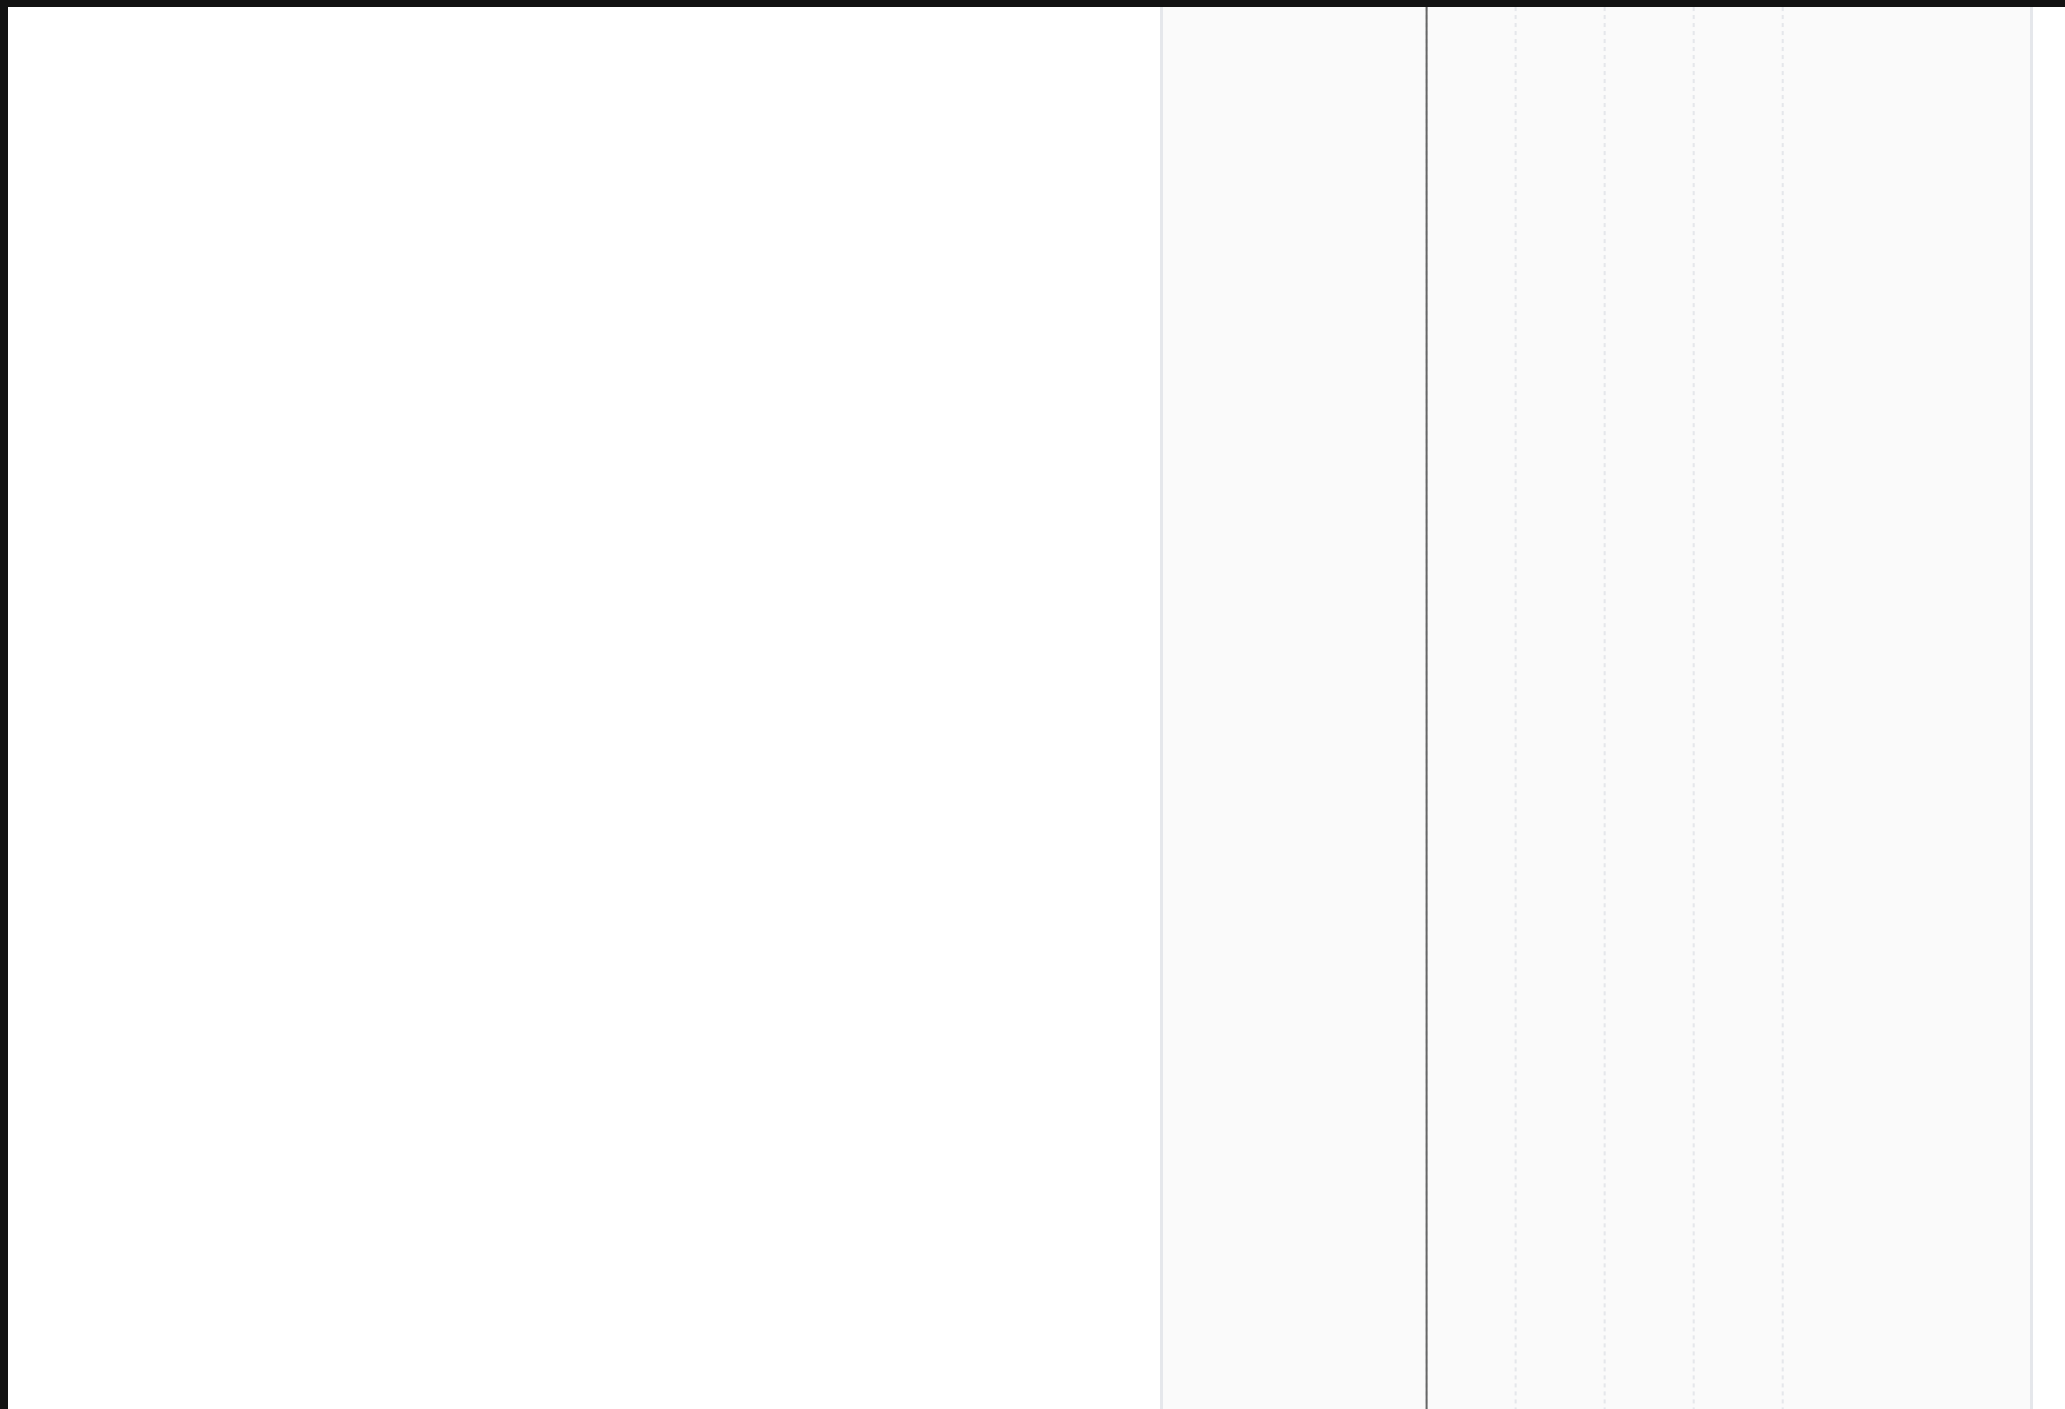

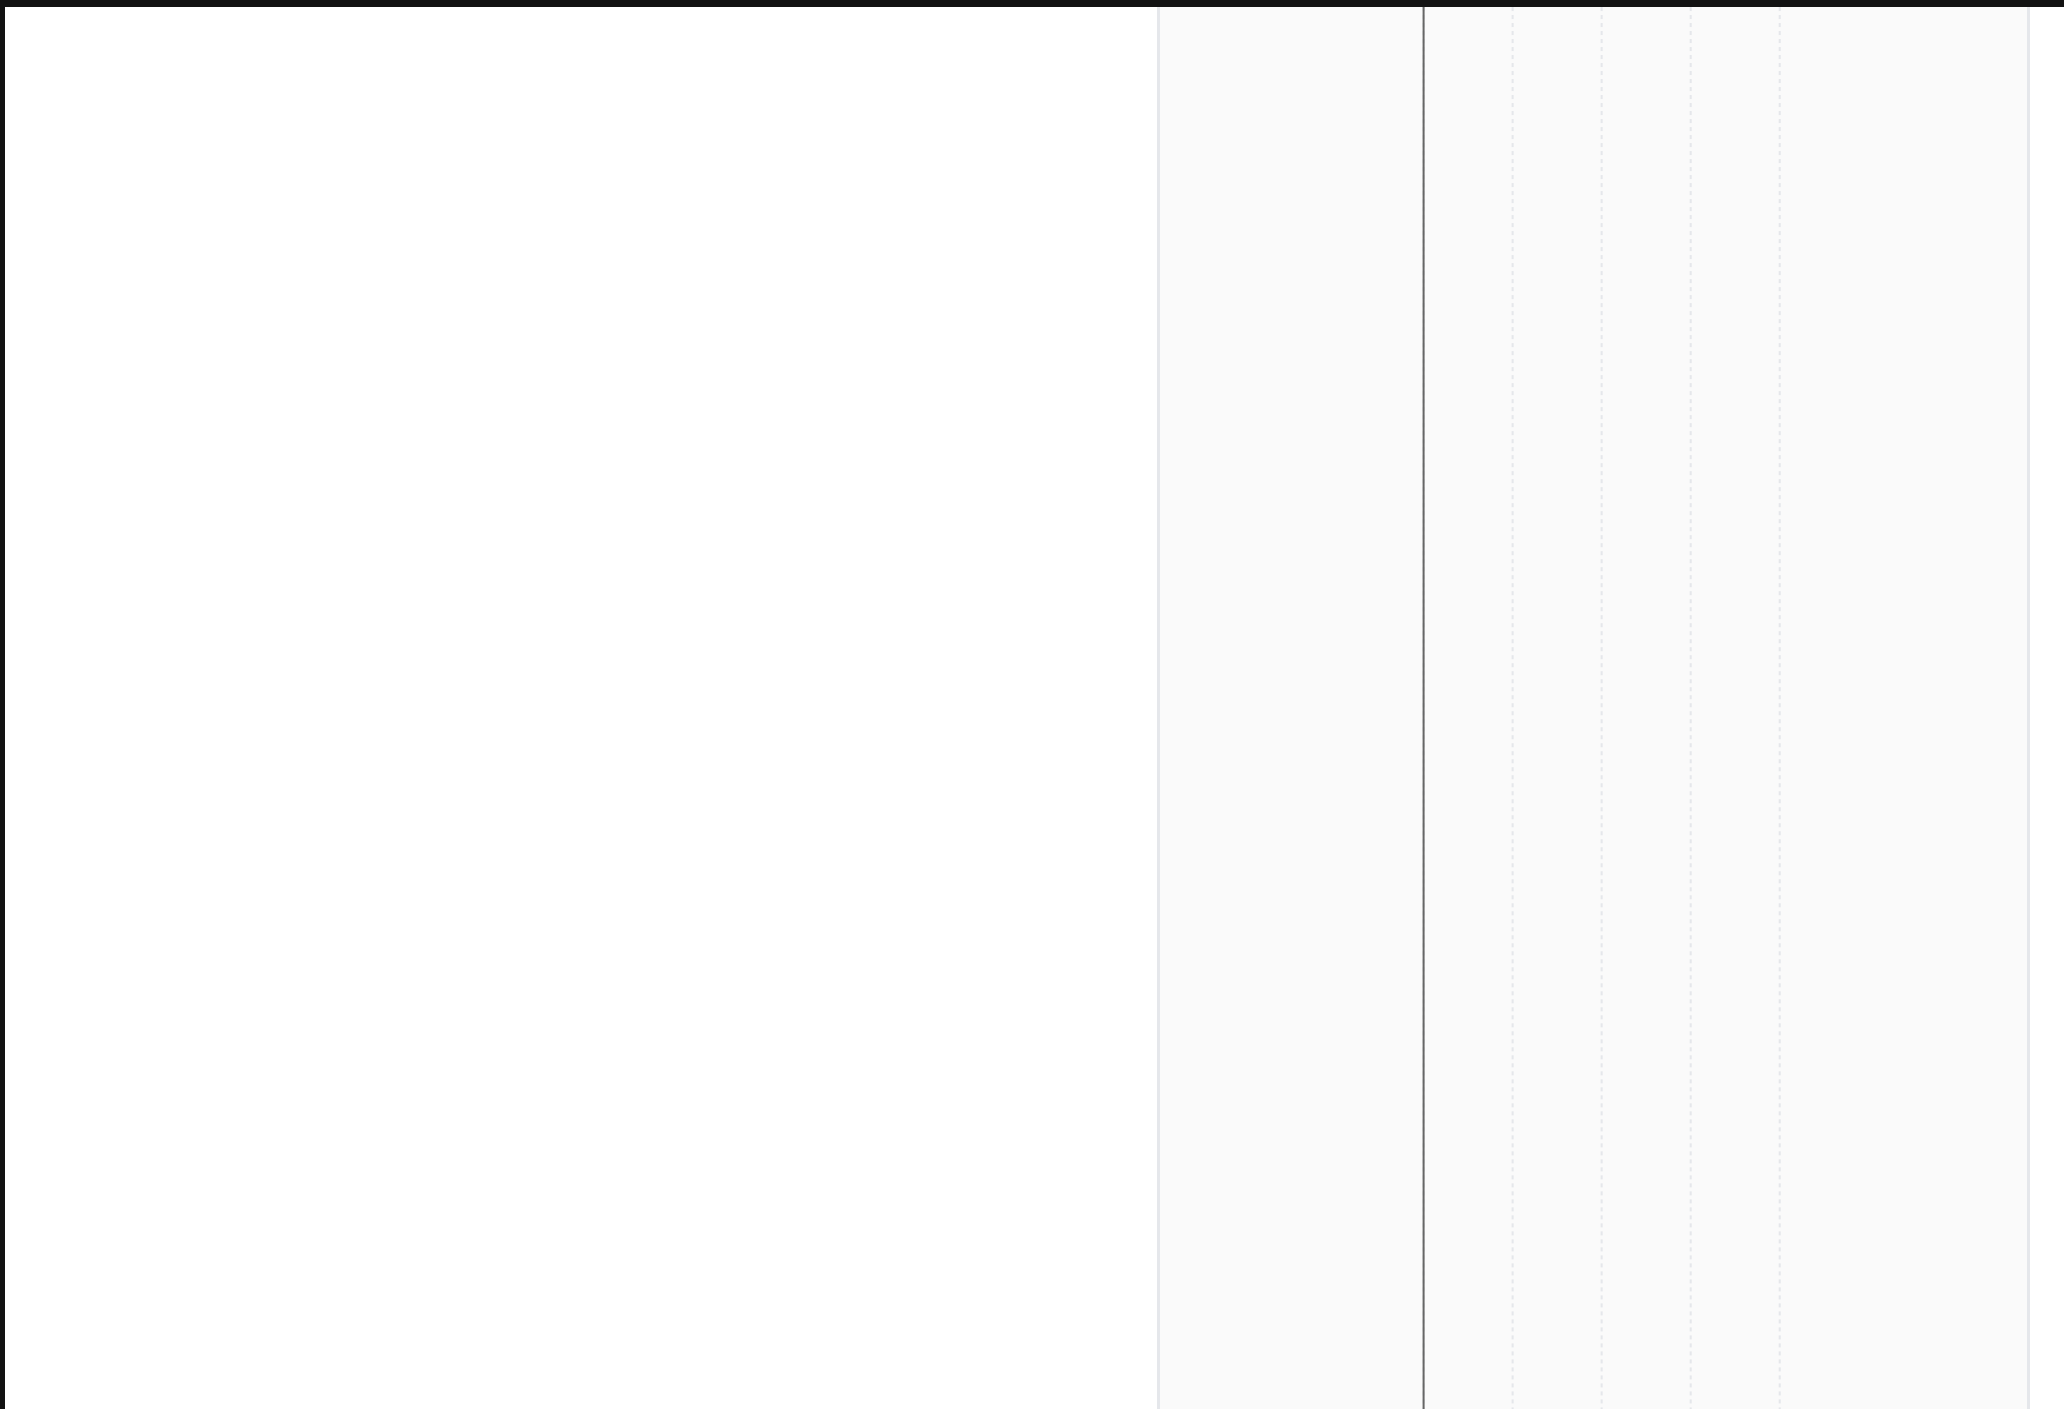

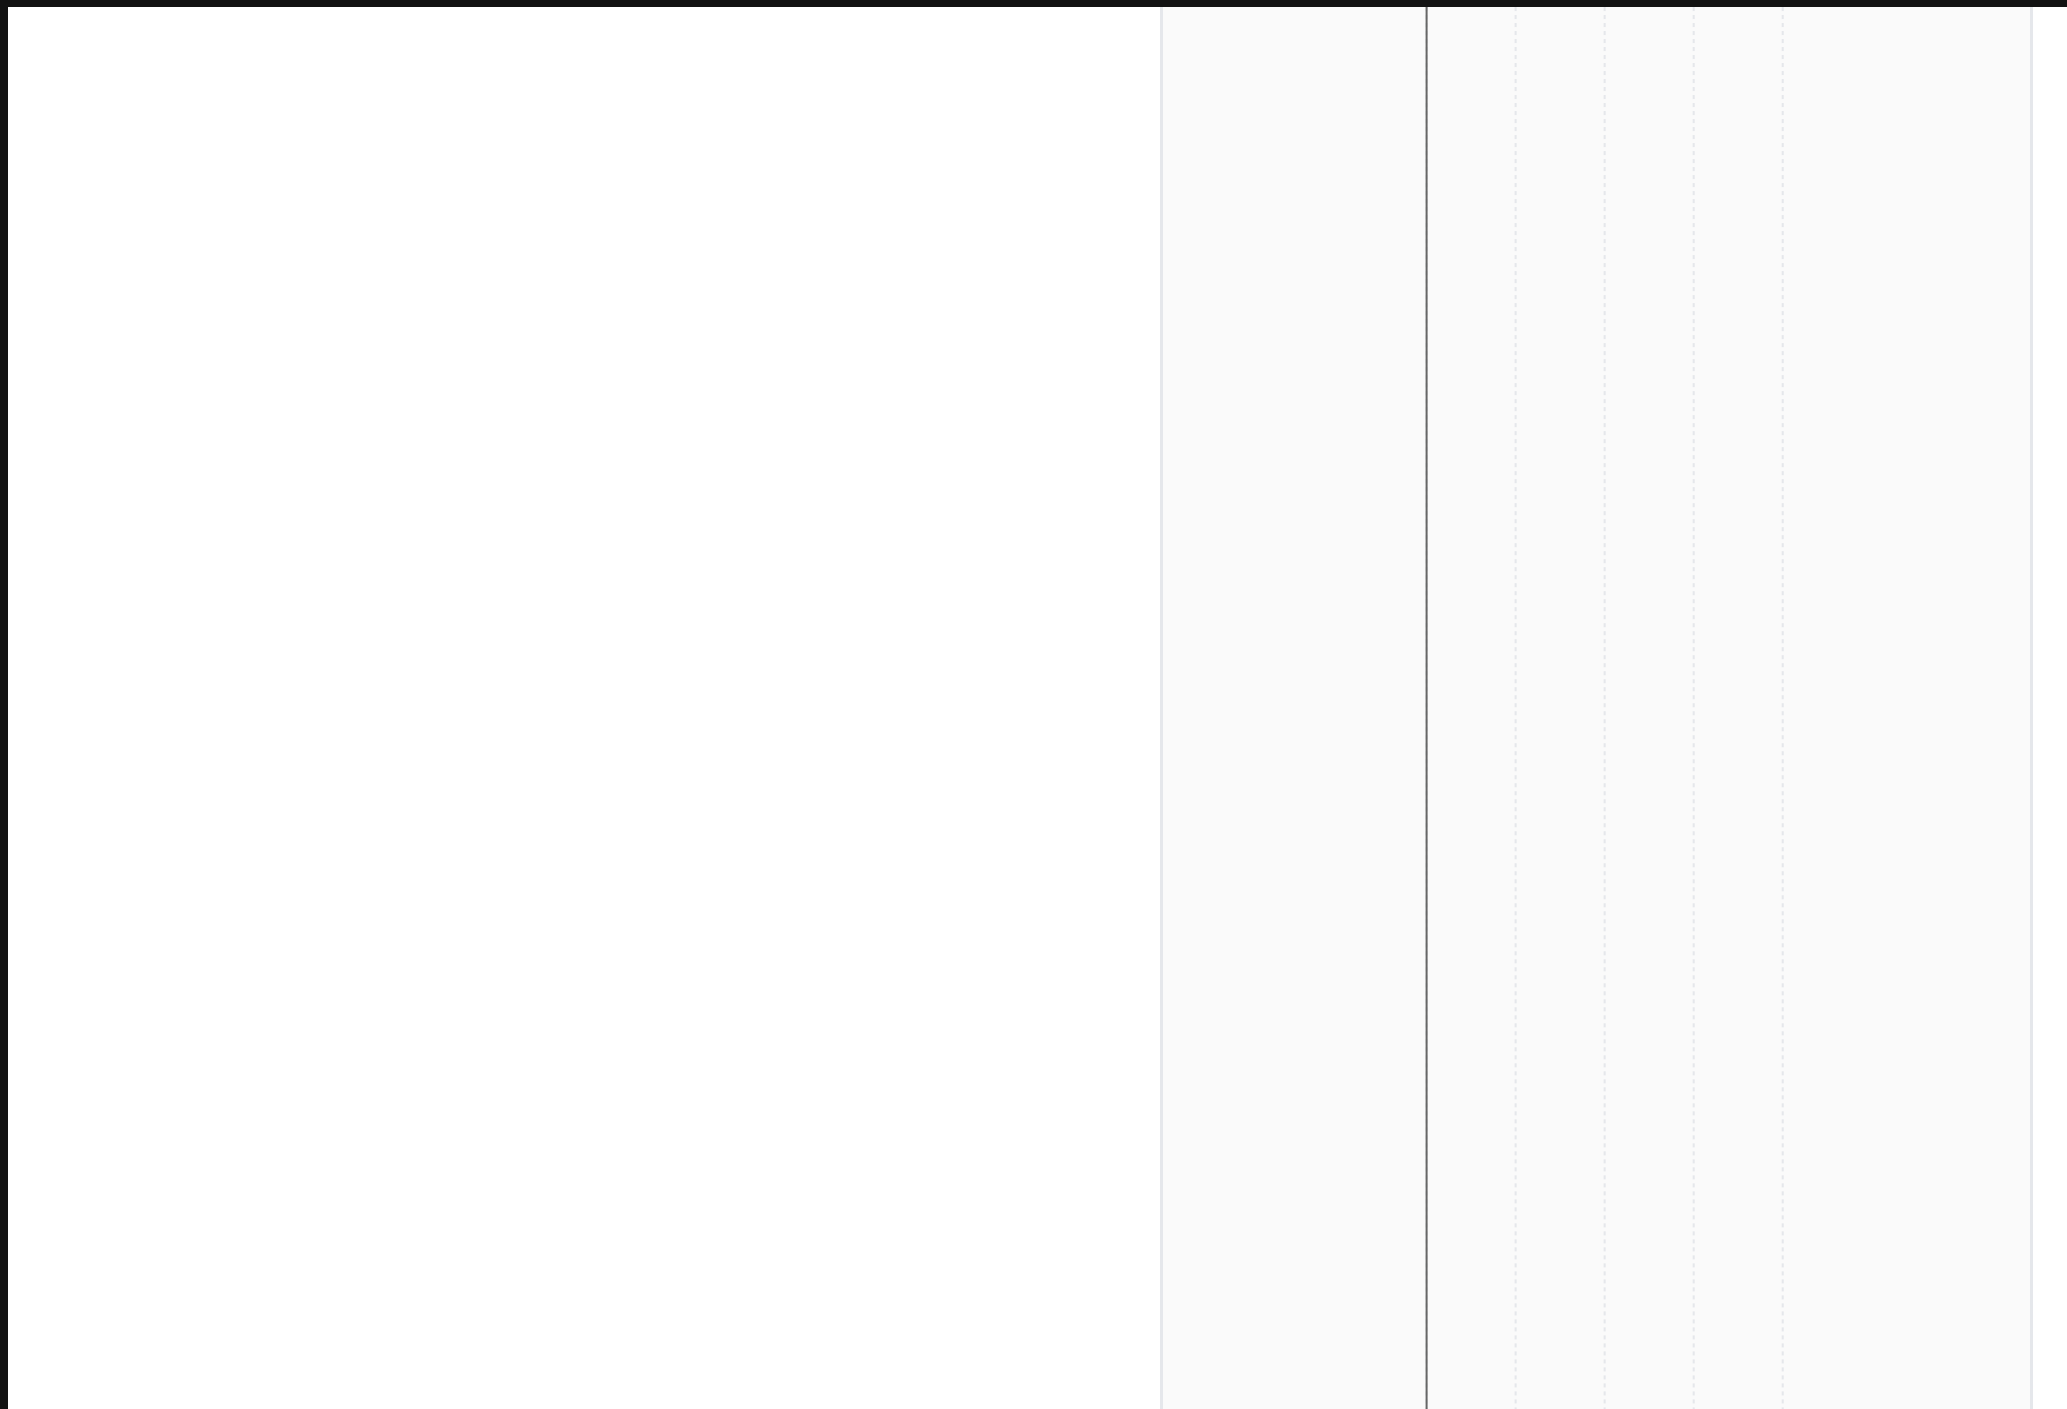

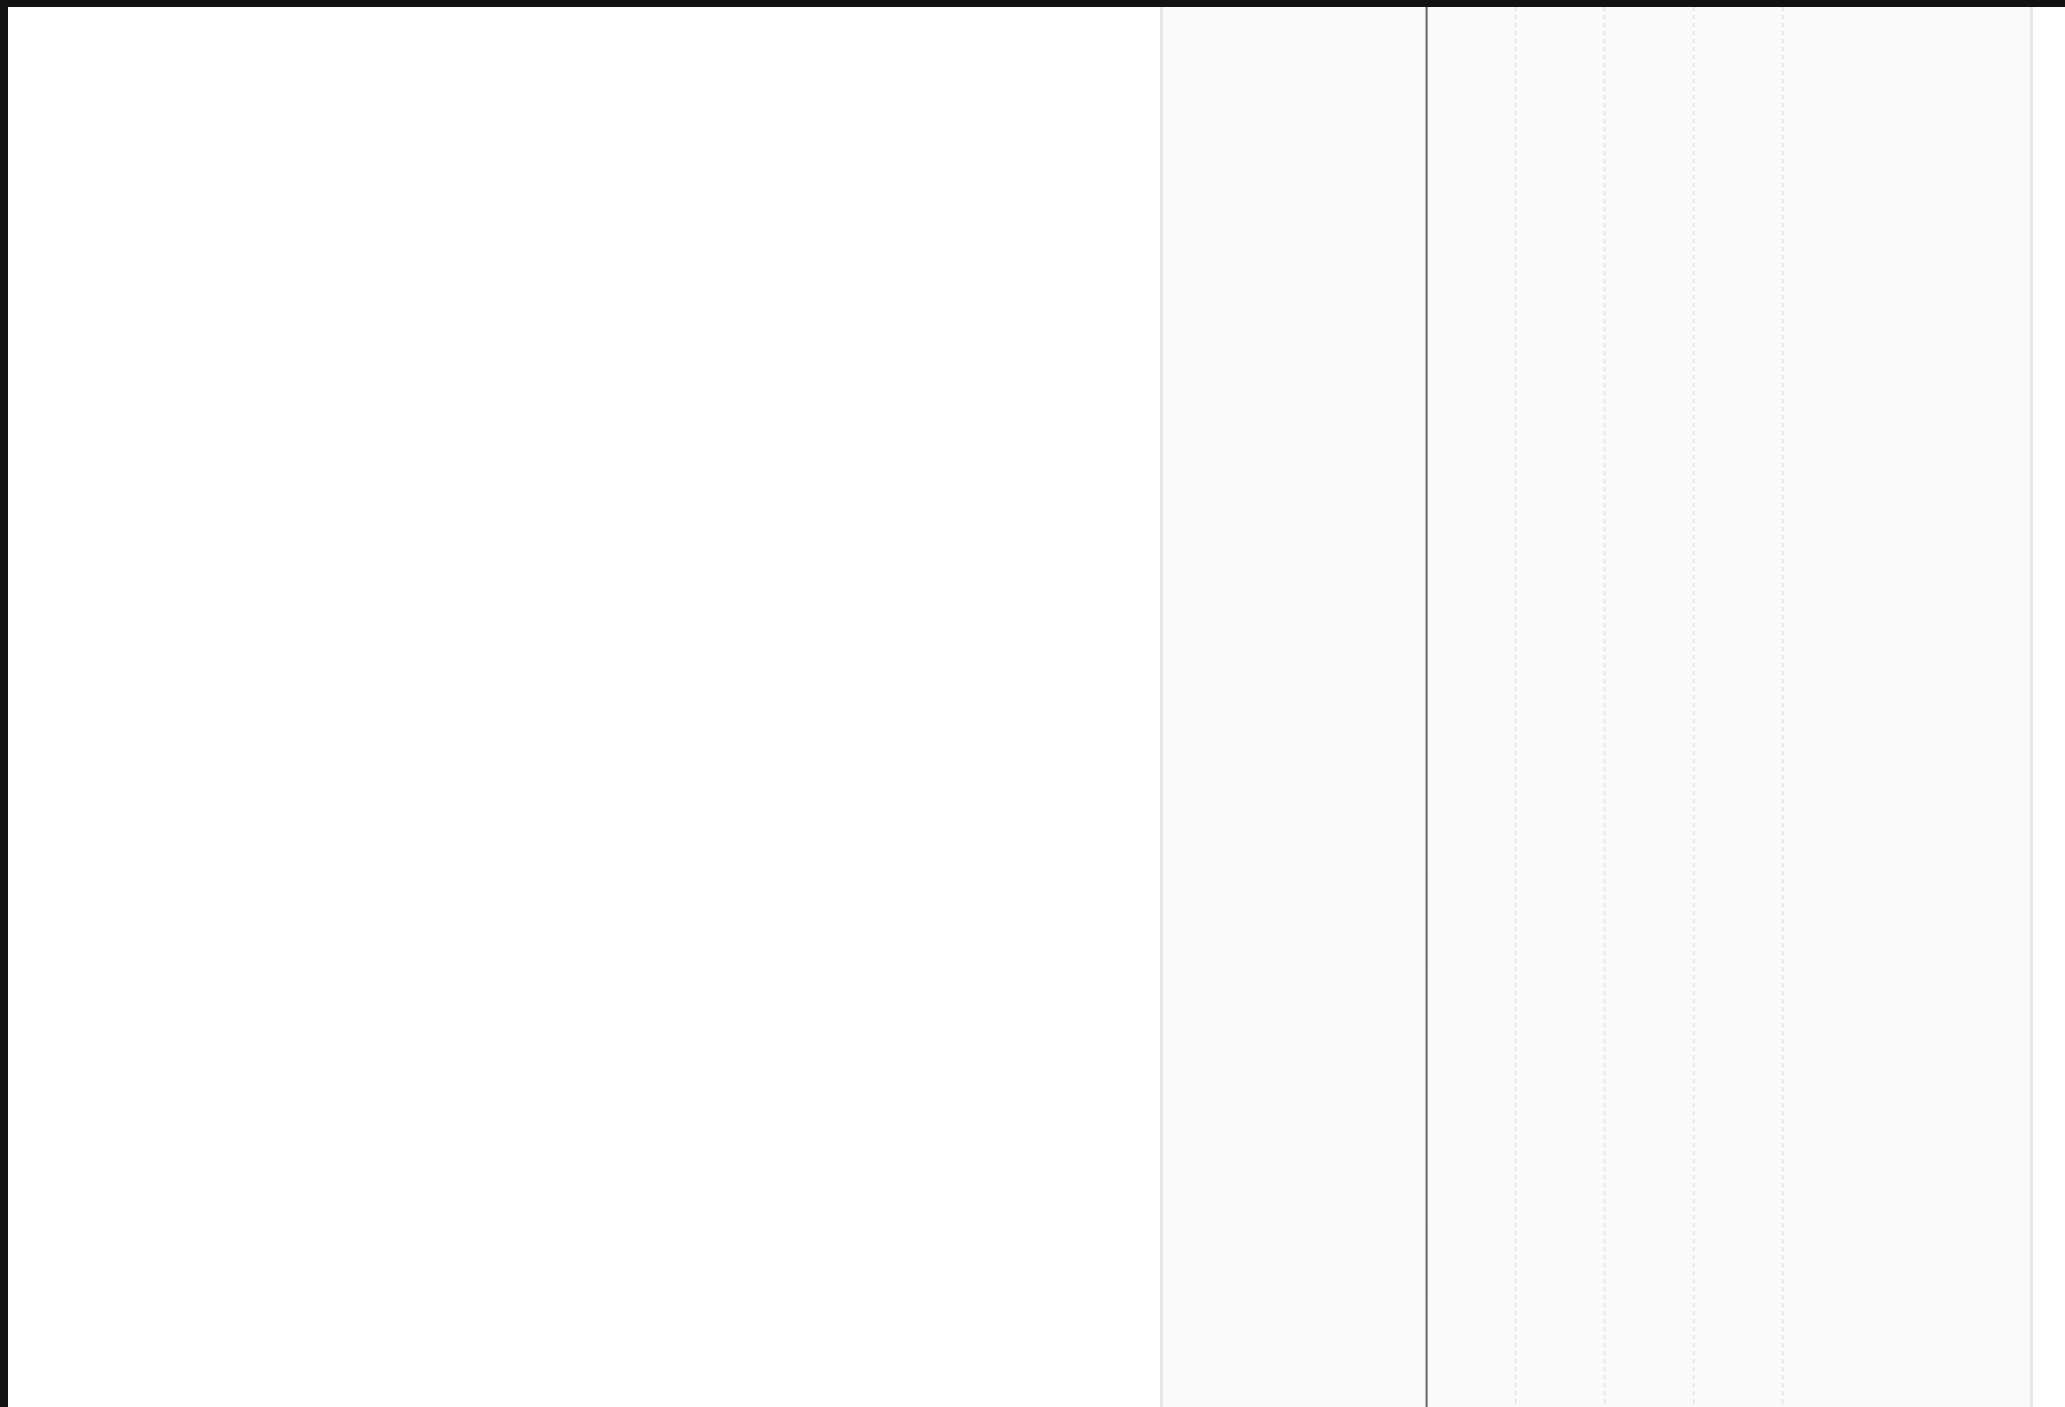

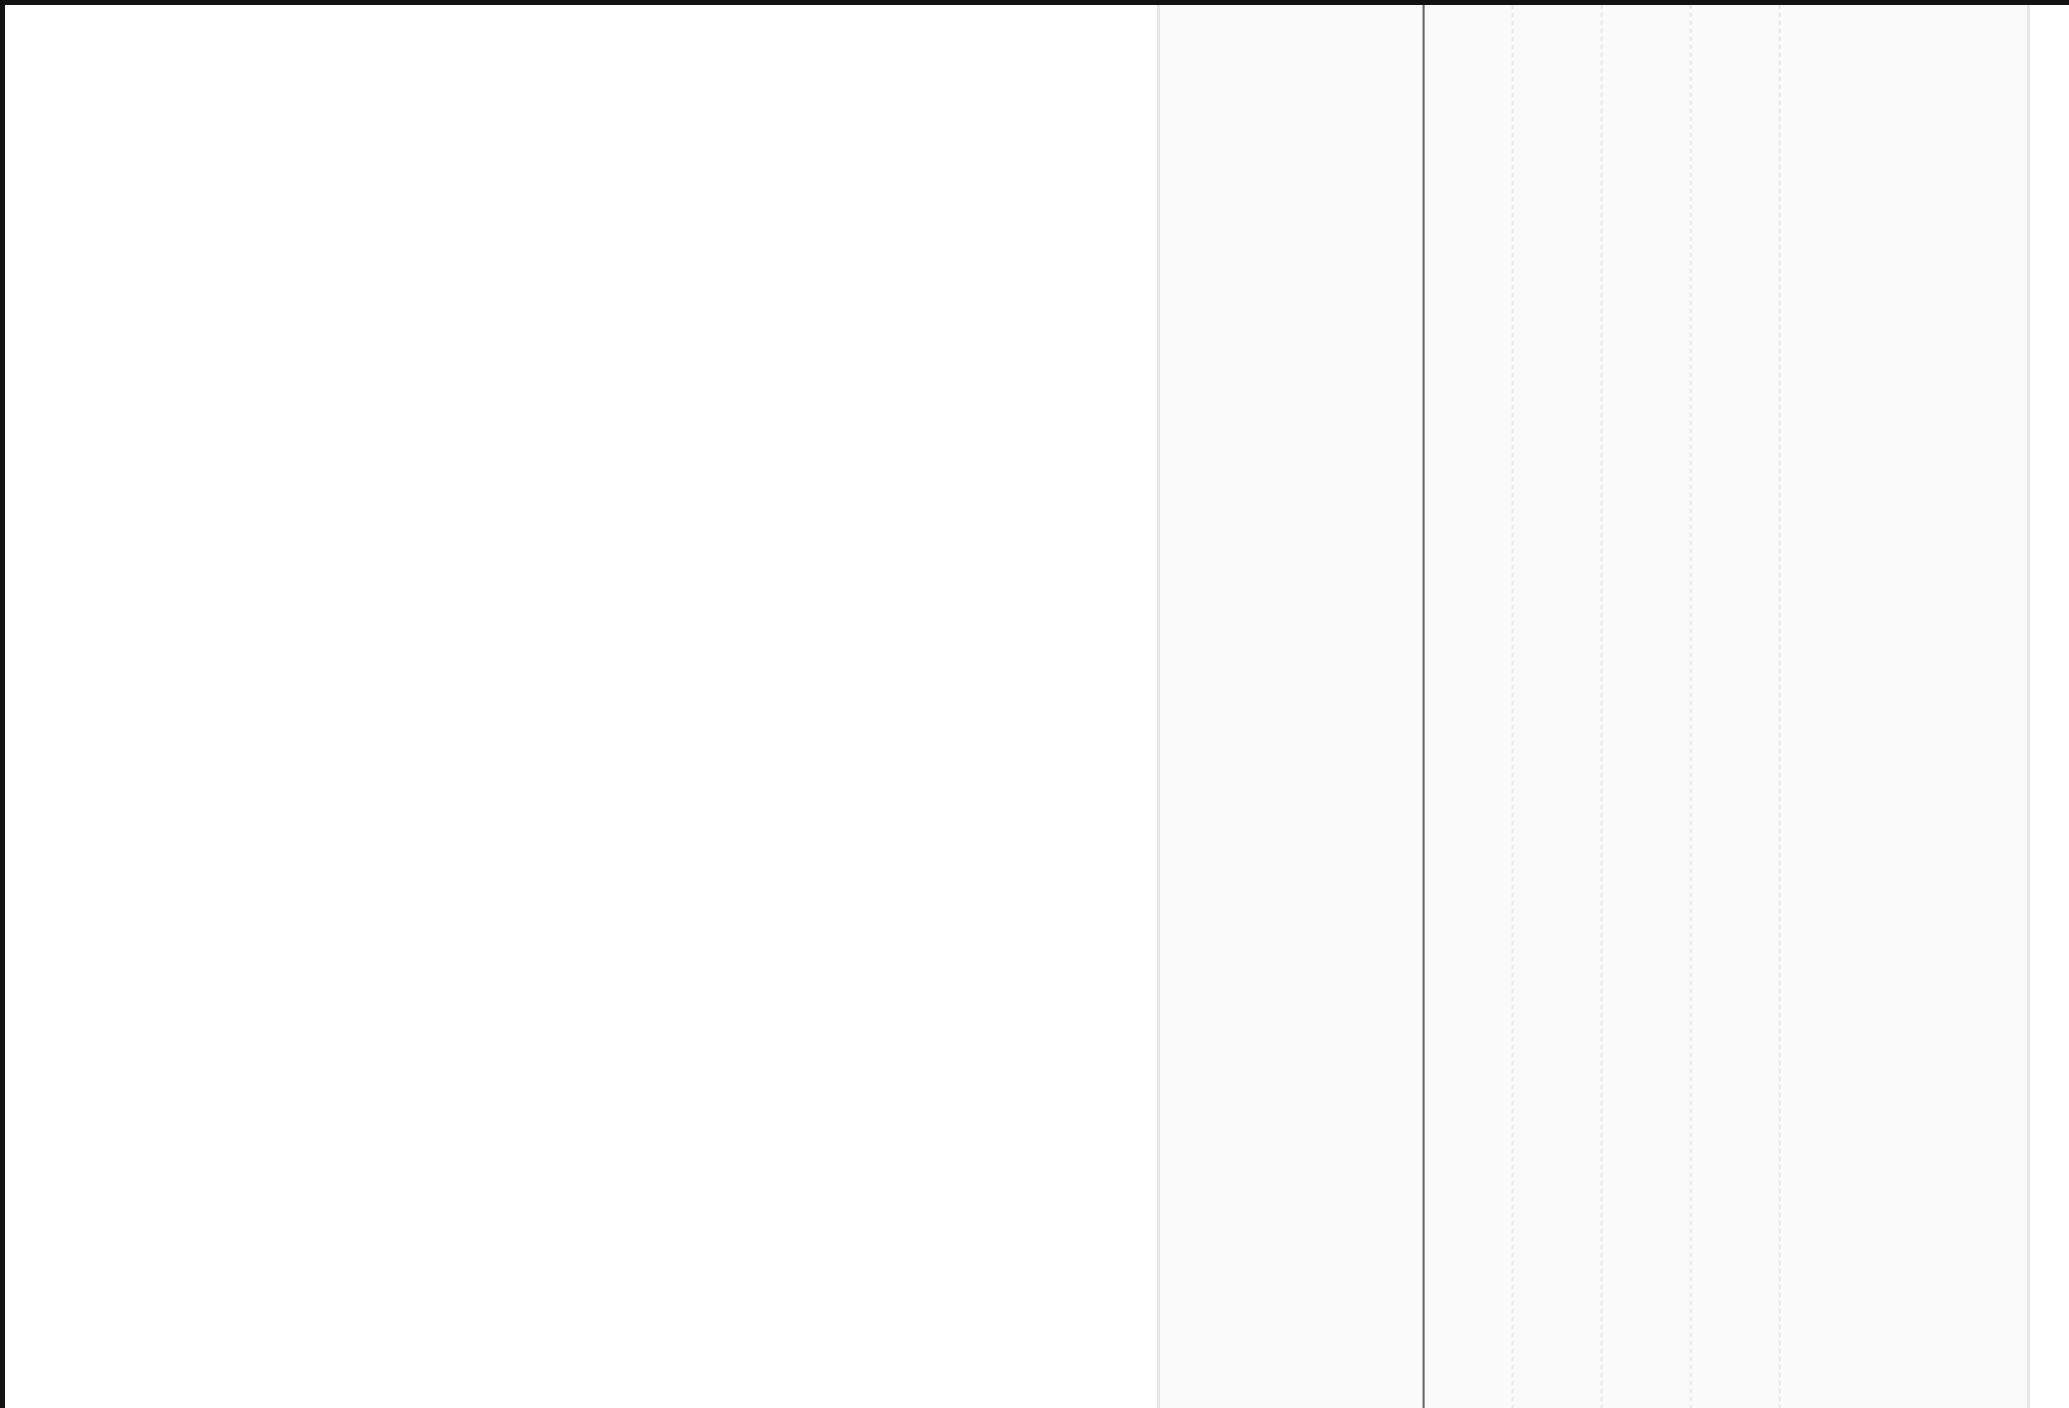

Smoke Test Area 001

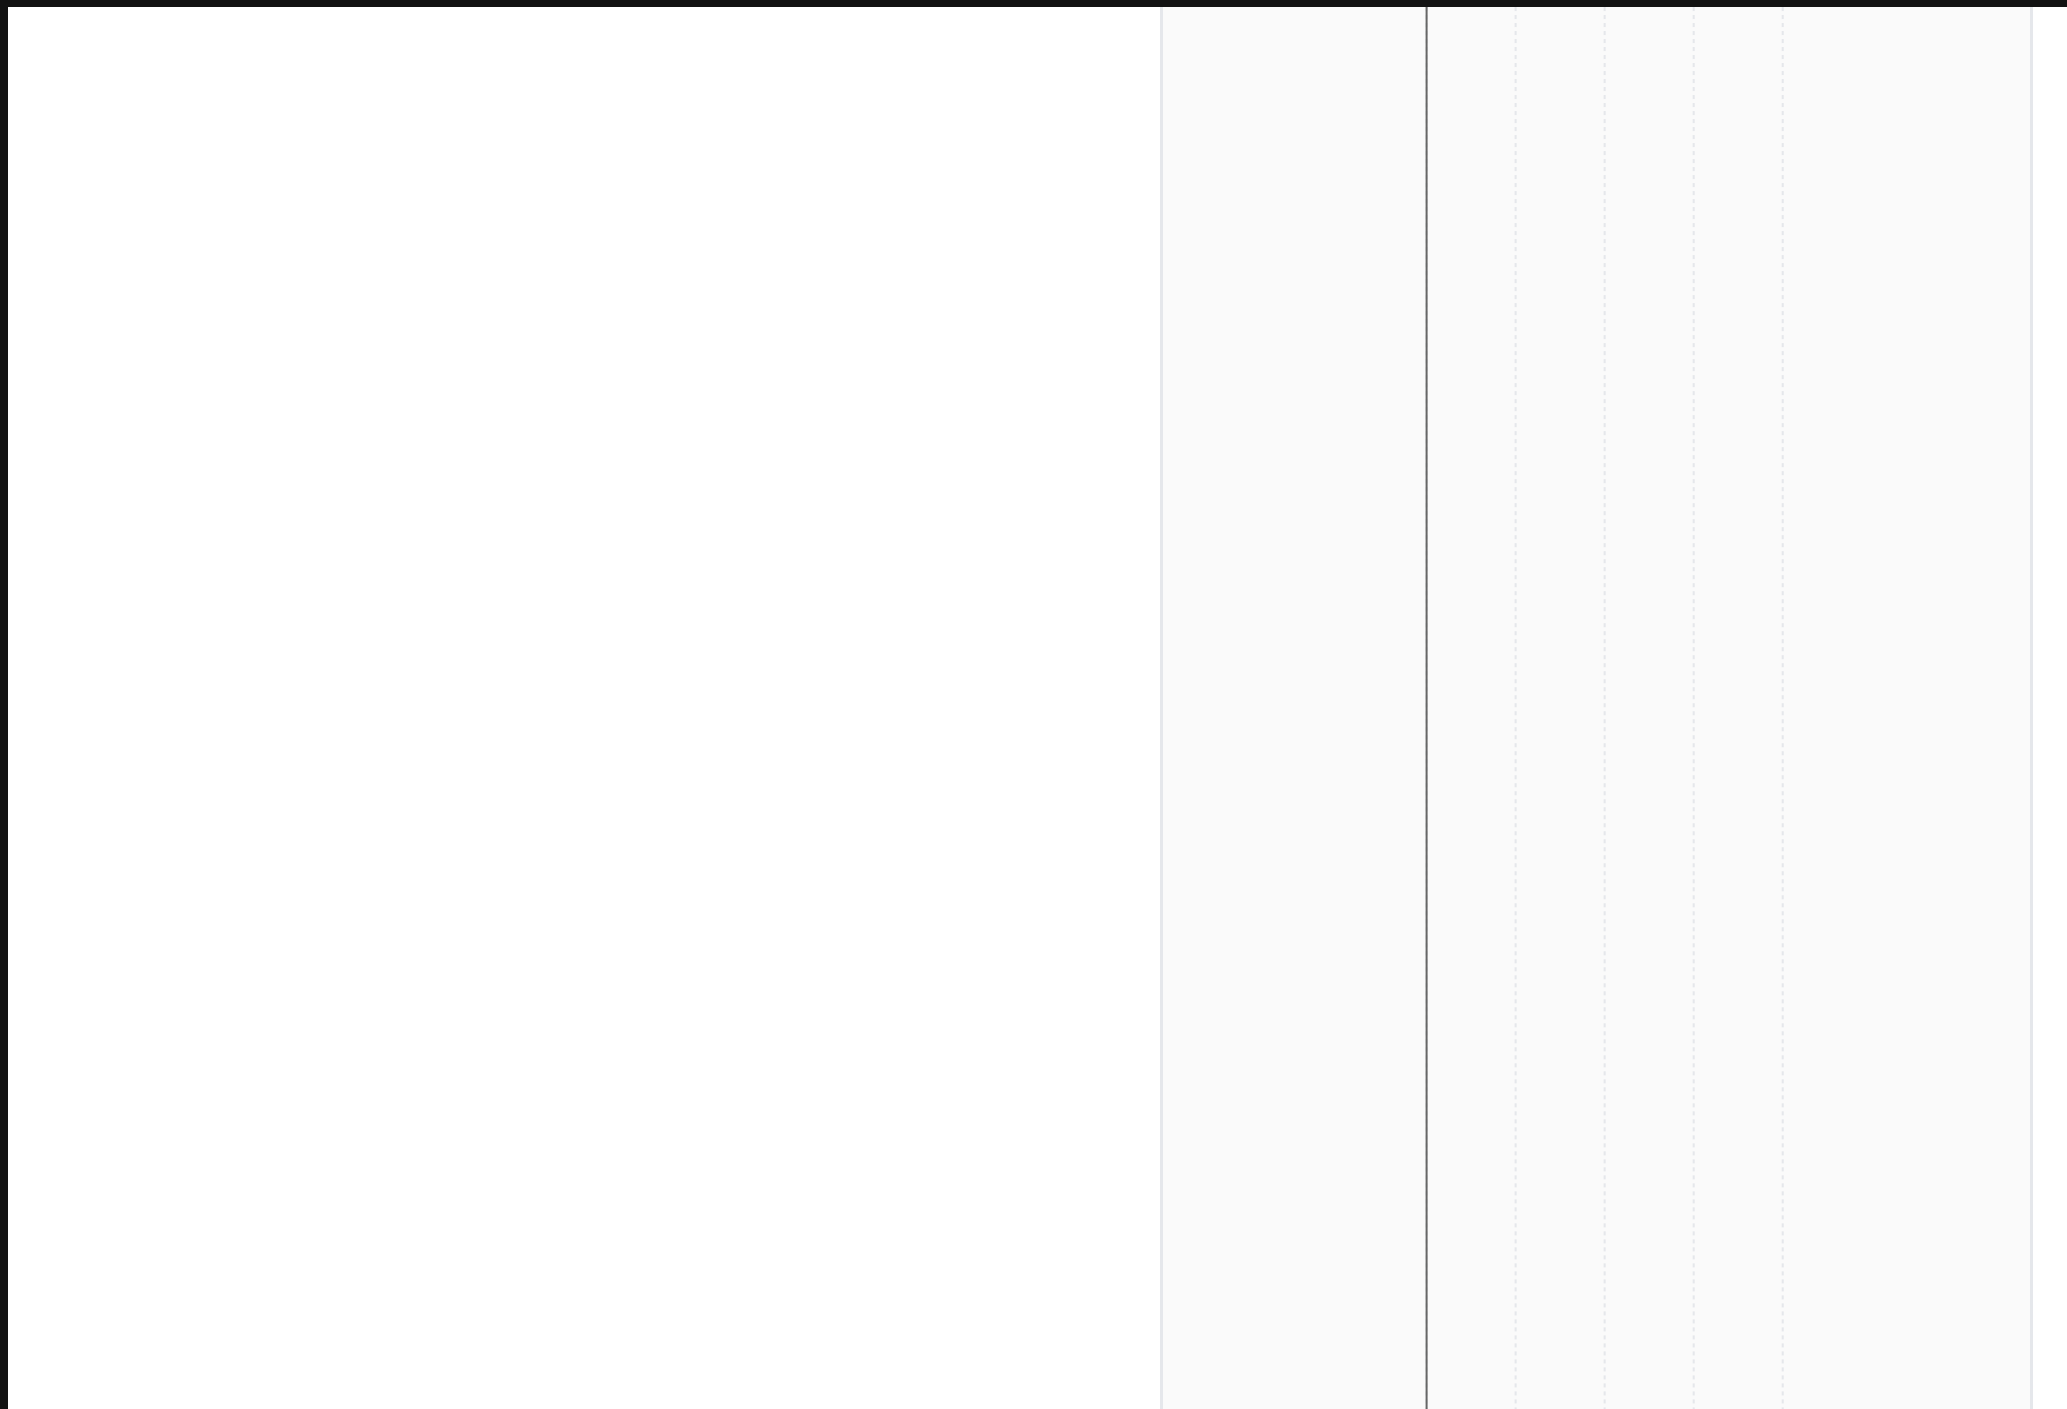

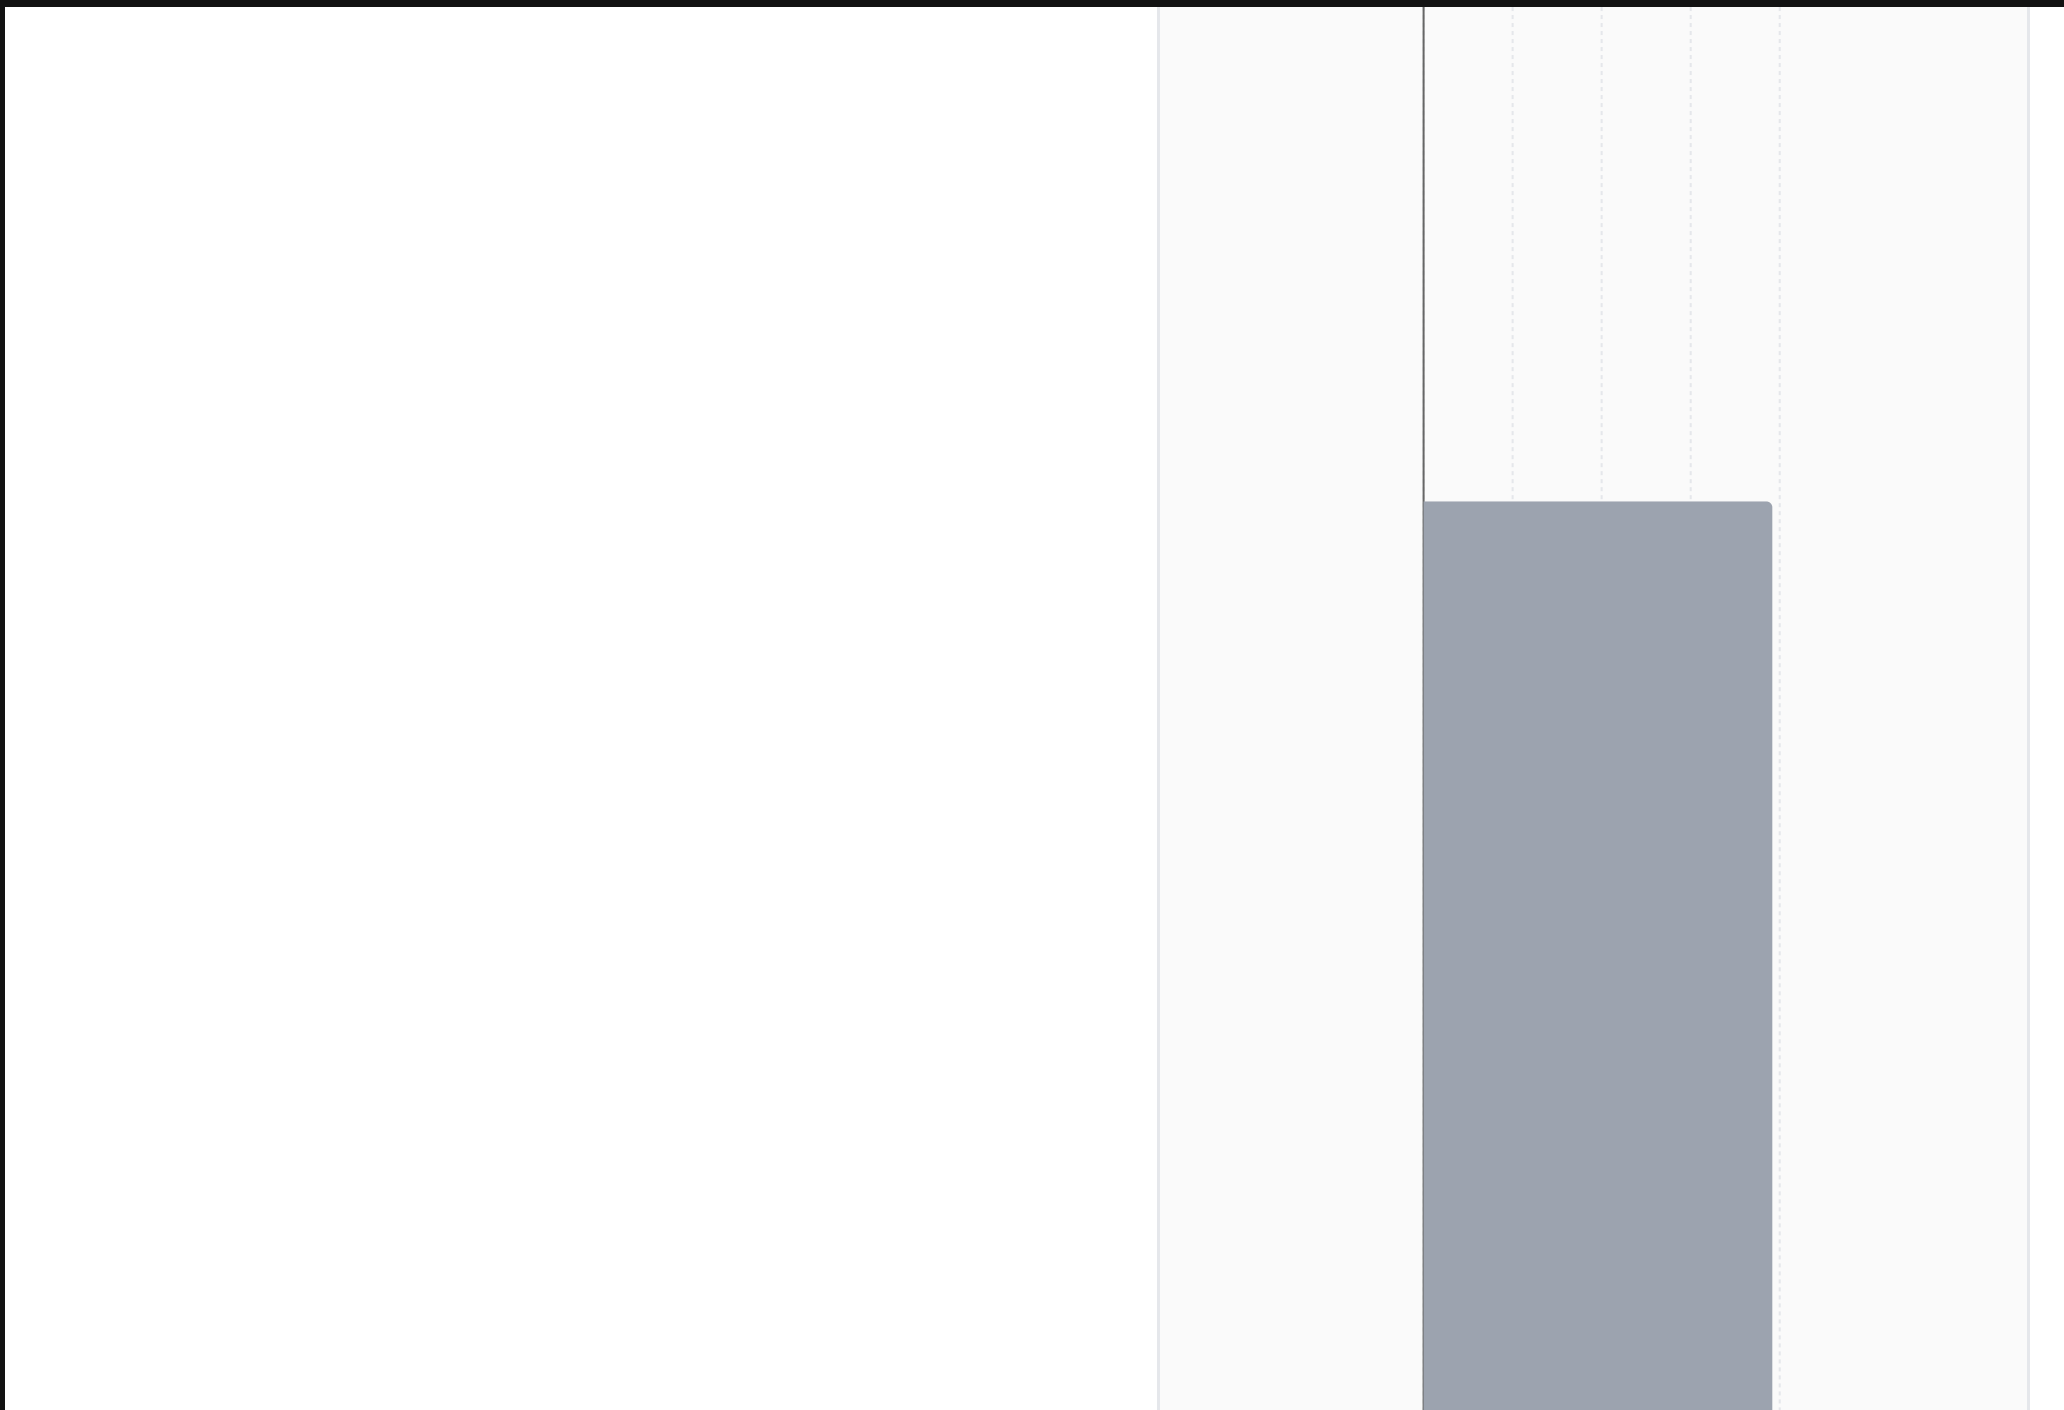

South Mangrove Zone

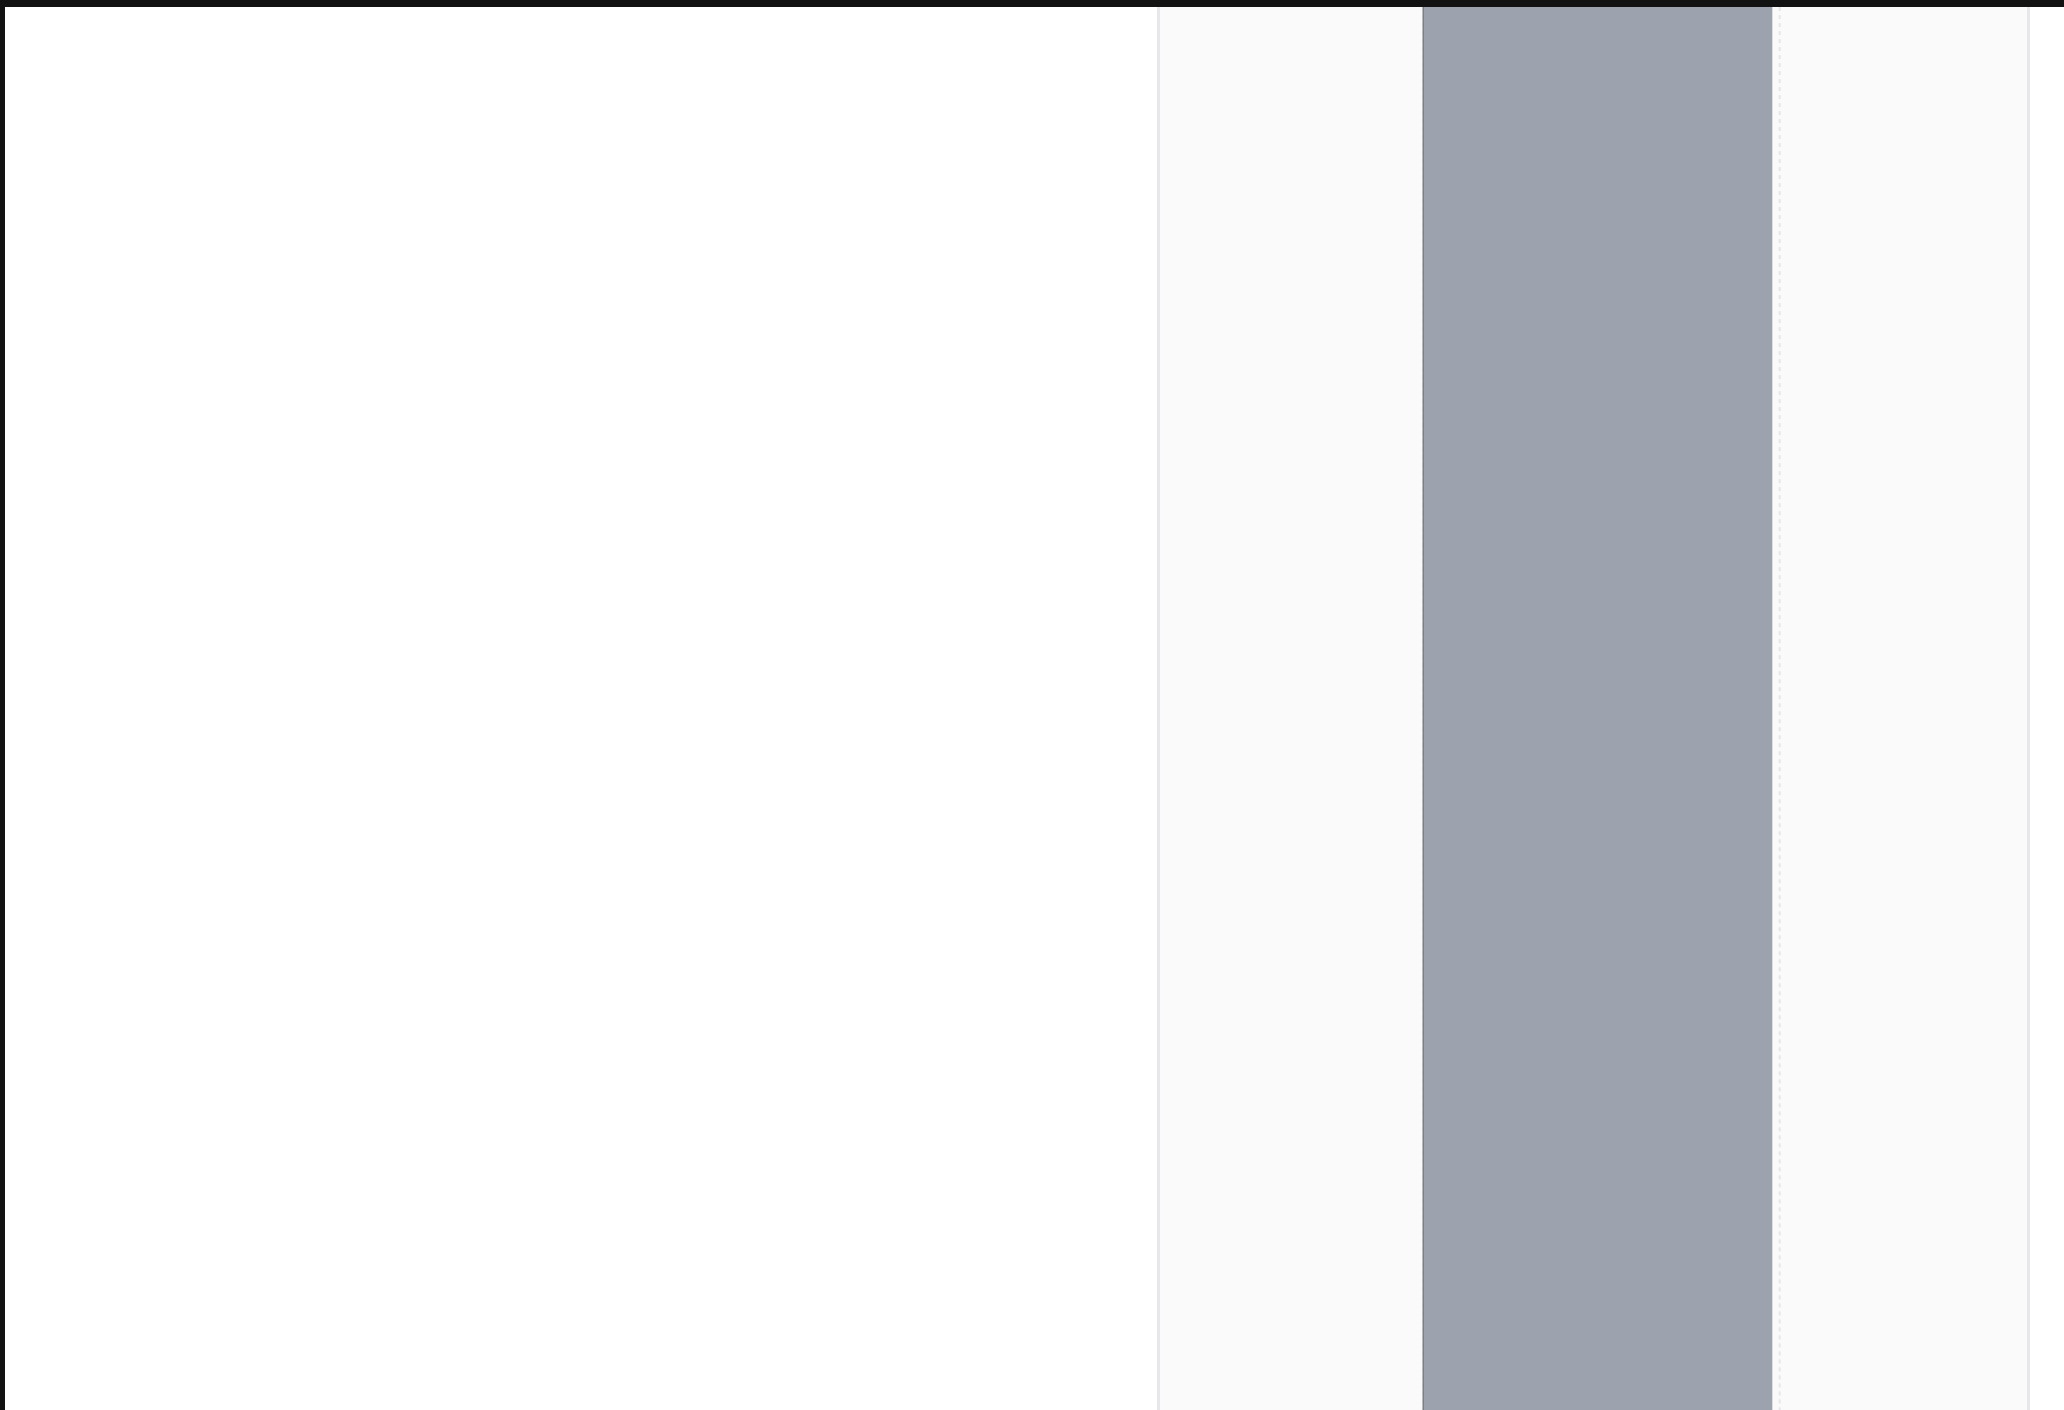

Outside enabled  
boundaries

**How patrols are attributed:** Each patrol is assigned to the enabled Area Boundary nearest to its recorded start location (within a 5 km threshold). When a patrol has no track start point, the patrol's free-text area name is matched against boundary names and aliases as a fallback. Patrols that match neither strategy are reported under *“Outside enabled boundaries”*— they are still counted on Page 1 but do not contribute to per-boundary tallies. Disabled boundaries never receive attributions.

Coverage by Boundary (3)

| Boundary Name       | Coverage Patrols | Coverage KMS | Coverage HRS |
|---------------------|------------------|--------------|--------------|
| North Reef Zone     | 0                | 0.00         | 0.0          |
| Smoke Test Area 001 | 0                | 0.00         | 0.0          |
| South Mangrove Zone | 0                | 0.00         | 0.0          |
| Total               | 0                | 0.00         | 0.0          |

Coverage KMS by Boundary

No coverage to chart for this period.

Notes on coverage figures

Coverage KMS = clipped length of each patrol track inside the boundary polygon, summed across all patrols in the period.  
Coverage HRS = patrol duration pro-rated by km fraction ( $\text{total\_hours} \times \text{clipped\_km} / \text{track\_total\_km}$ ). Rows with **Est.** indicate per-point timestamps were unavailable; per-point timing replaces this estimate when the schema upgrade lands.  
Coastline (LineString) boundaries are excluded from this table — clipping is only meaningful against Polygon boundaries.
