Enabled Boundaries (3)

Area Boundary	Patrols	By Track	By Name
North Reef Zone	0	0	0
Smoke Test Area 001	0	0	0
South Mangrove Zone	0	0	0
Outside enabled boundaries	236	—	—
Total	236	—	—

Patrols per Boundary

Smoke Test Area 001

South Mangrove Zone

Outside enabled
boundaries

How patrols are attributed: Each patrol is assigned to the enabled Area Boundary nearest to its recorded start location (within a 5 km threshold). When a patrol has no track start point, the patrol's free-text area name is matched against boundary names and aliases as a fallback. Patrols that match neither strategy are reported under *“Outside enabled boundaries”*— they are still counted on Page 1 but do not contribute to per-boundary tallies. Disabled boundaries never receive attributions.

Coverage by Boundary (3)

Boundary Name	Coverage Patrols	Coverage KMS	Coverage HRS
North Reef Zone	0	0.00	0.0
Smoke Test Area 001	0	0.00	0.0
South Mangrove Zone	0	0.00	0.0
Total	0	0.00	0.0

Coverage KMS by Boundary

No coverage to chart for this period.

Notes on coverage figures

Coverage KMS = clipped length of each patrol track inside the boundary polygon, summed across all patrols in the period.
Coverage HRS = patrol duration pro-rated by km fraction ($\text{total_hours} \times \text{clipped_km} / \text{track_total_km}$). Rows with **Est.** indicate per-point timestamps were unavailable; per-point timing replaces this estimate when the schema upgrade lands.
129 patrols have recorded hours but no track polyline — those hours are not included in any boundary's Coverage HRS above. Real coverage may exceed what is reported here.
Coastline (LineString) boundaries are excluded from this table — clipping is only meaningful against Polygon boundaries.
